

# 6clicks Platform

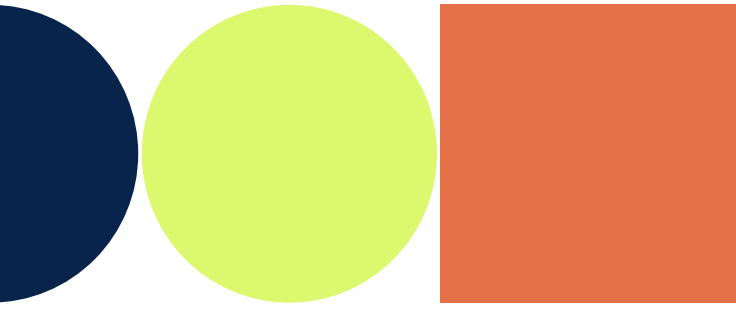

## The 6clicks platform can provide you with all the functionality you need for better risk and compliance management

Our platform includes Enterprise Risk Management with the ability to support many risk taxonomies, Obligations & Compliance, Flexible Audit and Assessment Workflow, ISMS, Issue & Incident, Policies & Controls for Governance Management, Metrics for tracking KRI's, Projects & Playbooks, Vendor & Third-Party Risk, Threat & Vulnerability, and Assets.

### The benefits of 6clicks

- Unlimited access to all content, unlimited users, unlimited vendor support
- Eliminate spreadsheets, manual mapping and policy writing by leveraging the power of Hailey to ensure regulatory accuracy and identify gaps in your program.
- Manage multiple, autonomous entities in a single pane-of-glass with 6clicks Hub & Spoke
- Easily furnish reports and dashboards to your executives and board with dynamic, on-demand data
- Maintain visibility into your organization's risk posture by tracking the Key Risk Indicators (KRIs) that matter most to you

- Leverage existing technology investments and bring all your data into one place by integrating 6clicks with external apps
- With support for unlimited vendors, 6clicks scales with your organization by aggregating your vendor data, automating your assessments, and helping you gain control over your vendor risk management process. 6clicks empowers you with a comprehensive view of all vendor data to manage risk, spend, contract information, obligations, supplier telemetry, and documents in one location.
- Encourage issue reporting across your organization with the ease of an anonymous external issue submission form
- Support your information security policies with Multi-Factor Authentication and Single-Sign-On
- Create a defensible position with your external auditor and respond quickly to inbound assessments via the 6clicks Public Trust Portal
- Direct access to our product and development team via an in-app 6clicks roadmap, change log, and feature request tool development team via an in-app 6clicks roadmap, change log, and feature request tool

## The 6clicks differentiators

### Hailey AI

Hailey AI was designed for just this purpose – to help risk and compliance professionals adhere to multiple standards by finding overlaps and streamlining the compliance process. It even assigns a similarity rating that enables you to decide what standards need to be attended separately.

### Hub & Spoke

The 6clicks Hub and Spoke model for centralized GRC practices helps organizations manage a hierarchical business model. Complete with ready-to-use content for immediate assessment, reporting and ongoing management.

### Content Library

Access our built-in content library of over 50,000 elements across standards, laws, regulations, audit/assessment templates, policies and control sets, playbooks, reporting templates, risk libraries, incident response playbooks, risk methodologies and much more. Add your own unique content that only you has access too.
