

Audits & Assessments with 6clicks

The ongoing measurement of a cybersecurity program is imperative for any organization.

Measuring control effectiveness is the objective and while the means of measurement comes in many forms, an assessment tool makes for faster, more reliable, and actionable results.

A compliance, risk and audit management solution can expedite and improve the process, through efficiency and mitigation of human error, providing faster results and a smarter path to stronger security.

With our Hailey AI engine, voluminous content library, out-of-box workflows, and seamless integrations, 6clicks provides you with a unified, real-time view of your organization and supply chain's risk and compliance posture.

Providing the contextual insight needed to make informed, strategic decisions that keep your organization secure, with 6clicks you are better able to earn the trust of your clients, partners, investors, vendors and employees and elevate your brand in the market.

- Leverage the readily available assessment templates and authority documents from the 'standard agnostic' integrated content library.
- Use Hailey AI for automated crosswalks to assess once and show potential compliance to many, as well as gap analysis.
- Built-in workflows and notifications allow for organizations to facilitate the in-app collaboration with control owners, reviewers, and approvers.
- Conduct self-assessments and audits of your organization with Requirement Based Assessments for easy response and review in a single pane-of-glass.
- Create custom, dynamic Questionnaire Based Assessments with qualitative risk ratings or quantitative weighted scoring options to bulk send to internal or external stakeholders.
- Automate the creation of remediation plans and risks based on assessment results.
- Track the full lifecycle of remediation plans and risk treatments from creation to completion with task management capabilities.
- Create a defensible position with your auditors with version control, history logs, and audit trails of all assessment tasks.
- Utilize the 6clicks Trust Portal to deliver your completed assessments, governance documents, and supporting information to your external auditor or others, on an as needed basis.
- Report progress, status, results, trends and more to your board and management teams with the rich reporting functionality available in 6clicks analytics.
- 6clicks is a SaaS platform, hosted in Microsoft Azure.
- Extensive enablement resources are available to our clients at no cost, including our Knowledge Base, Academy, in-app Roadmap, Feature Request tool, and 24x6 technical support.
